

Ready Vet Go!

An exhibit on the move

Exhibit Components

The Ready Vet Go! exhibit has four key clinic areas:

Reception Area

Young office managers greet clients, take calls and schedule appointments using the office computer. The reception area includes a desk, faux computer keyboard and screen and business telephone.

Grooming Station and Exam Table

Clinic technicians provide care using a variety of tools and props. They can explore and interpret the anatomy of animals using charts and x-rays. Multiple procedures can be conducted including applying bandages, general pet check-ups and pet grooming. Owner counseling sessions can be conducted discussing proper pet nutrition, activities and exercise.

Staff Check-in Area

Members of the clinic team plan their work day, and grab a bilingual check-list clipboard (with role and activity prompts) and a smock and stethoscope.

Kennels

Rounds begin with a stop at the clinic's kennels, where pet patients are kept while in the veterinarian's care.
