museum for all

An accessibility guide to enjoying the Museum

Updated February 2023
**welcome!**

**Mission and Guidelines for Play**

Our mission at the Children's Museum of Denver at Marsico Campus is to create extraordinary experiences that champion the wonder and joy of childhood. The following guidelines help ensure a safe and fun learning environment for all.

- Children and adults must stay together.
- Adults are responsible for the supervision of children at all times.
- Please, no food or drinks in the exhibits.
- Shoes are required inside the Museum (except in the Early Learners’ Oasis).
- Treat other guests and Museum materials with kindness and respect.
- And above all, have fun!

**Comfortable Stay**

The Children’s Museum has partnered with several local organizations, including Spectra Autism Centers of Colorado and Anchor Center for Blind Children, to develop this guide to help you get the most out of your visit. We also have the following items available at the front desk to make your visit more enjoyable:

- Wheelchairs
- Noise-cancelling headphones
- Soothing weighted lap pads and neck wraps
- Grip-assists for paint brushes in The Art Studio and tools in The Assembly Plant

Training

Our staff receives ongoing training to supplement and improve the time all families spend in our Museum. Daily educational programs and StoryTimes are designed for inclusion.

Low-sensory Evenings

By limiting attendance and turning down some of the ambient noise in the Museum, we offer an enjoyable space for children to play with their families.

Admission is free for families of children with disabilities during our Low-sensory Evenings. Please email KayceM@cmdenver.org for info and to reserve your spot (required).

Tours & Contact Info

If you have questions or would like a tour from a staff member, please contact our School Programs Manager, Kayce Moormeier, at KayceM@cmdenver.org or 303-561-0113. Tours must be scheduled one week in advance and are dependent upon staff availability.
my visit today
When I visit the Children’s Museum, there are exciting things to do and see, and I will have many choices about what activities I want to do. When we arrive, I will need to wait for a grown-up who works at the Museum to check us in. Then it will be time to explore the Museum!

There are many different rooms at the Museum called exhibits. I need to remember to share all of the toys and activities in the exhibits with other children.

The people who work at the Children’s Museum are very nice. They can help me if I need something. They all wear black lanyards around their necks and have black or grey shirts.

While I am here, I can ask the front desk for headphones, a wheelchair, grip assists or weighted pads.

---

**Things to Remember**

1. I need to stay with my grown-up.
2. I need to walk. If I run, I can hurt myself or others.
3. I need to take turns with other children.
4. I can tell my grown-up if the exhibits are too loud or too busy for me.
5. I can have fun!

If I turn the page, I can see and read about the different exhibits in the Children’s Museum and choose where I want to go on my visit.
The atmosphere and noise-level is different for each exhibit and can vary depending on time of day. If your child is sensitive to noise, avoid areas that indicate high levels of noise, or borrow a pair of headphones from the front desk.

This indicates the exhibit can be messy and may require some level of clean-up after play.

This indicates the exhibit is suitable for babies and young children, newborn through age three.

This indicates the exhibit requires children share toys and tools while they play.

This indicates the exhibit requires children share toys and tools while they play.

SEASONAL EXPERIENCE, OPEN MAY – OCTOBER, EXACT DATES VARY

Climbers must be 5 years old or 44 inches tall and be able to climb independently.

While playing outside, I can go with my grown-up to the back of the park to the big climbing place! My grown-up can help me find out if I am old enough or tall enough to play here. The person who works at the Museum will tell us about climbing safely. To be safe, I will wear a helmet to protect my head. If I want, my grown-up can go with me, or I can climb by myself. I can climb down any time if I don’t want to keep going up. I can take a ride on a rope swing, crawl through tunnels, and go down a giant slide. I can ask the Museum staff to show me the different ways to go up or down. If I get too hot or cold, I can ask my grown-up to go back inside.

NOTE FOR GROWN-UPS

Adventure Forest is a seasonal experience and will close in the event of inclement weather, including precipitation, high winds, lightning, heat or in cases of low air quality.
I can climb, crawl and walk through this exhibit. At the top, there are windows where I can see outside. I have to put on a helmet to protect my head and wear a card on my shirt. If I want, my grown-up can go with me. There are lots of other kids in this exhibit so I should be sure to watch where I am going. I can climb down at any point. I have to remember that this is a small space with uneven platforms, so I need to use my walking feet. If I get stuck, I can ask a Museum staff member for help.

**note for grown-ups**

It is recommend that climbers are at least 40” tall to climb alone.
If I am too small to go into Altitude, the big climber, I can play here. I can climb through different boxes or try balancing in the kayak. There is also a wall of fog that I can move through. My grown-up will be close by if I need help. I have to remember to watch where I am going because there are other kids in this small space.
When I walk into this exhibit, I will see a big fire truck that has lights and sirens. I can press buttons that make sounds. If I want, I can put on a firefighter’s jacket and hat. I can practice how to call 911 and learn what I should do in a fire. I can also go down the fire pole or aim the fire hose at a window to put out a fire. If the sirens are too loud for me, I can ask to go to a different exhibit or put on headphones.

★ note for grown-ups ★

This space has an ADA compliant fire hose at the Putting Out The Fire experience.
If I want to play outside, I can go to this exhibit. I can play in the sand or in the apple truck. During the summer, I can also play in the water. I can take a ride on the zip line. If I can’t get on by myself, I might need to ask my grown-up for help. I need to remember to take turns with other kids in line to ride the zip line. I can also build a fort. If I get too hot or cold, I can ask my grown-up to go back inside.

note for grown-ups

Come prepared for outdoor messy play! In the summer, this means bring a swimsuit, towel, sunscreen and a change of clothes. In the winter, we recommend boots, a jacket, hat and mittens. There are transfer platforms available in the Sand Dunes and the River. Chlorine is utilized in the water to keep the exhibit safe and clean.
In this exhibit, I can pretend that I am a veterinarian. I can put on a coat and stethoscope to help the stuffed animals. There are many toys to play with in this exhibit, including an x-ray machine for animals and different veterinarian tools. I need to remember to share the animals with other kids so that everyone gets a turn.
SNOW DAYS

Seasonal experience, open
December – February, exact dates vary

Joy Park has different, fun things to do during the wintertime. I can ice skate with slipper covers over my shoes, go sledding, build a snow person, throw snowballs, go ice fishing for pretend fish and play with the stuffed sled dogs. There are outside fires where I can warm up if I get cold. If it’s too cold, I can ask my grown-up to go back inside.

note for grown-ups

Come prepared for outdoor play with boots, a jacket, hat and mittens.
This exhibit shows me how water moves. I can put balls into a water tornado or I can fill buckets to shoot water in the air. I can also put boats in the river and watch them float. I should remember to use my walking feet because the floor can be slippery.

NOTE FOR GROWN-UPS

Play in WATER can result in clothing getting wet. Extra clothes are recommended. Chlorine is utilized to keep the exhibit safe and clean.
I can paint in this exhibit or play with clay. There are many different colors I can paint with. If my hands get dirty, I can wash them in the sink that is just my size.

If I want to play with other kids, I can draw on the windows with chalk paint or on the big car. I have to let my paintings dry before I can take them home. I can put them on the drying rack and then go somewhere else to play. We just have to remember to come back and pick them up!

**note for grown-ups**

This space offers an ADA clay table, painting easels and collaborative painting experience, as well as grip assists for paint brushes.
In this exhibit, I get to use real tools to create a project. I can follow the directions written on one of the blueprints or I can make something on my own. I need to stay safe and work with my grown-up. I should start by putting on my plastic safety glasses so I don’t get anything in my eyes and headphones to protect my ears from loud sounds. I can use different materials like cardboard, plastic water bottles, wood and egg cartons to make projects like helicopters, spiders or robots. I need to remember to pick up all my trash and put away all my tools.

note for grown-ups

This space offers an ADA compliant work station and headphones, as well as tools with grips assists, which are located in the back of the exhibit.
This is a very quiet exhibit where I can put on a puppet show or take a break and read a book. There are many different books that I can read. If I am just learning to read, I can find a small book but if I already know how to read I can find a bigger book. There are all kinds of books that will be just right for me. There might be a staff member reading stories. If I want, I can sit and listen to their stories.

NOTE FOR GROWN-UPS

This is a quiet space, great for taking a break. Weighted lap pads and neck wraps are available at the front desk.
In here, I can make big bubbles with rings or create a wall of bubbles around me. I will be making bubbles with soap so I should put on the plastic glasses to keep the soap out of my eyes. I need to remember to use my walking feet because the floor may be slippery. Lots of friends like to play in here so it may be crowded. I will have to wait my turn to play. When I am finished, I can wash my hands in the sink that is just my size.
I can pretend that I am camping here. If I want, I can put on an animal costume to dress up like an ant, rabbit or even a squirrel. I can put different animals around the campsite. I can also practice tying a knot with a rope. If I have trouble, I can ask my grown-up for help. I can also play inside of the tent with my friends. There is always a lot going on around this exhibit so if I want to take a break, I just need to ask my grown-up.
This exhibit has a lot to do! The walls are high and I have to move through a maze. I can pick up tubes and find energy balls inside of them. Once I find energy balls, I can take them to the hot air balloon and watch it take off. I can make a rocket with the help of my grown-up and launch it high in the air. I can try on different wings or capes at the wind wall and see what it feels like to fly. I can play a special piano with lights or make art with the giant Lite Brite.
In this exhibit, I can be a scientist. I can learn about movement and motion with balls, ramps and rollers. If I want, I can build a mini-roller coaster. I need to remember to share the balls and tracks with other kids. I should use my walking feet because there are a lot of bright orange balls on the ground that I could trip on. When there are enough balls in the bin, a siren goes off, lights flash and the balls drop to the floor. If the siren is too loud for me, I can ask my grown-up to go somewhere a little quieter or ask for headphones.
In this exhibit, I can pretend to go to the market. There are lots of fruits and vegetables for me to choose from as well as milk and cheese. When I am at the market, I can use a basket to gather my food or I can go behind the counter and pretend to sell the food. Once I have all my food I can go into the kitchen, put on an apron and make something. I can follow one of the recipes that are next to the oven. This will tell me what food I need and how to make it. When I am all done playing here, I need to remember to put away my toys in the right bins.

NOTE FOR GROWN-UPS

This space has an ADA compliant table in the farmhouse kitchen.
If I want to go to a class in The Teaching Kitchen, I need to ask my grown-up to sign us up on the sheet outside the doors. In the kitchen, I can learn how to make different things to eat by listening to the instructions and following a step-by-step recipe. I have to work with my grown-up and remember to ask before I eat anything. Sometimes the class uses kitchen tools that require safe behavior or help from a grown-up. It is important to follow the rules in the kitchen so that I stay safe.

**note for grown-ups**

This space offers an ADA compliant observation counter for demonstrations and table for class participation.
have fun!
